

King Cobra Rib Drill

Pneumatic powered hand-held rotary drill... Built tough for coal, stone and concrete.

FEATURES

NO KICK-BACK STEEL GEARED MOTOR: Energy efficient & extends the life of the machine.

LIGHTWEIGHT: 20 lbs (not including air line and oiler).

POWERFUL: 58 ft lbs of torque at stall.

LOW VELOCITY EXHAUST: Air velocity is dissipated within 1 ft of machine, preventing dust or other exhaust discharge from affecting operator. Polymer casing prevents exhaust from escaping out the sides and reduces noise.

NO EXTERNAL COMPONENTS: Water distribution is internal and delivered through drill shaft, eliminating the need for external components that can be damaged, causing leaks.

VERSATILE: Standard configuration allows operator to drill with water or dry. Dust collection option available.

SIMPLE SET-UP: 1" Chicago fitting. Recommend running an in-line oiler.

TECHNICAL SPECS

Torque range	58 ft lbs (at stall)
RPM range	Infinitely variable from 0-1400
Air hose size	3/4" or 1"
Drill Chucks	Manufactured to customer specification
Output	150 ft lbs (at stall)
Height	9.5"
Width	21.65"
Depth	9.45"
Weight	20 lbs
Noise Level	105 dBA
